

Social Media Content Analyzer

Project Approach

The **Social Media Content Analyzer** is designed to transform raw content into meaningful insights that drive **higher engagement**.

- Built using **React + TypeScript** for robust and scalable frontend development.
 - Styled with **Tailwind CSS** for a modern and responsive UI.
 - Developed with **Vite** for faster builds and smooth developer experience.
 - The focus was on **simplicity, usability, and real-time content analysis** to help users improve their social media strategies.
